

Compressor-cooled incubator ICP260

Do you require different ramps for incubating, breeding or storing? Do you need a larger chamber volume and at the same time quick temperature changes?

With the help of our model selection, with dimensioned model sketches and extensive technical data for download, you can find the right cooled incubator for your needs. For small volumes and for work predominantly in the proximity of the ambient temperature, the Memmert Peltier-cooled incubator is recommended. Flexibility and technical features of our appliances meet all possible needs. Put us to the test!

ControlCOCKPIT	adaptive multifunctional digital PID-microprocessor controller with 2 high-definition TFT-colour displays		
Temperature	2 Pt100 sensors Class A in 4-wire-circuit, mutually monitoring and taking over the performance at the same temperature value		
Timer	Digital backwards counter with target time setting, adjustable from 1 minute to 99 days		
Temperature			
	from -12°C up to +60°C (optimum performance of cooling aggregate at an ambient temperature of +16°C up to +32°C)		
resolution of display for setpoint and actual temperature values	0.1°C		
Control technology			
adjustable parameters	temperature (Celsius or Fahrenheit), fan speed, programme time, time zones, summertime/wintertime		
Function SetpointWAIT	the process time does not start until the set temperature is reached		
Language setting	German/English/Spanish/French		
Calibration	three freely selectable temperature values		
Ventilation			
Fan	forced air circulation in working chamber adjustable from 10 to 100 % in 10 % steps		
Communication			
Programming	AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port		
Documentation	programme stored in case of power failure		
Safety			
Autodiagnostic system	for fault analysis		
Alarm	visual and acoustic		
Temperature control	over- and undertemperature monitor TWW, protection class 3.3 or adjustable temperature limiter TWB, protection class 2, selectable on display		
AutoSAFETY	additionally integrated over- and undertemperature protection "ASF", automatically following the setpoint value at a preset tolerance range, alarm in case of over- or undertemperature, heating is switched off in case of overtemperature, compressor in case of undertemperature		
Temperature control	mechanical temperature limiter TB, protection class 1 according to DIN 12880 to switch off the heating approx. 10°C above nominal temperature		

Control of standard components

Heating concept

no drying-up of the load caused by the cooling device due to separation of thermal jacket from interior

energy-saving use of CFC-free cooling/heating system (refrigerant R134a)

highly efficient automatic defrosting system

air jacket heating system for gentle all-around heating

Standard equipment

Door	fully insulated stainless steel door with 2-point locking (compression door lock)	
Door	inner glass door	
Internals	2 stainless steel grids	
Scope of delivery	incl. works calibration certificate for +10°C and +37°C	
Housing	rear zinc-plated steel	
Installation	on lockable castors	

Stainless steel interior

w _(A) x h _(B) x d _(C) : 640 x 800 x 500 mm	
Volume 256 l	
Max. loading of chamber: 200 kg	

Textured stainless steel casing

w _(D) x h _(E) x d _(F) : 824 x 15	52 x 684 mm	

Electrical data

115 V, 50/60 Hz / approx. 1200 W	
230 V, 50/60 Hz / approx. 1200 W	

Packing/shipping data

the appliances must be transported upright

Customs tariff number	8419 8998
Country of origin	Federal Republic of Germany
WEEE-RegNo.	DE 66812464
	Dimensions approx incl. carton B x H x T: 930 x 1760 x 930 mm
	Net weight approx. 157 kg
	Gross weight carton approx. 214 kg

Standard units are safety-approved and bear the test marks
