Built for the bench.
Priced for the budget.

Limited time offer: Available until 18 December 2026.

Special edition shaker built for microbial labs that need a reliable shaker — not every option in the catalog.

The Minitron SE (Special Edition) is a fixed-configuration incubator shaker for microbial work. Same Swiss-engineered platform. Same proven reliability. Built for the labs that do essential research. One fixed configuration — uncooled or cooled — at a price designed for tighter budgets.

- **One fixed configuration — uncooled or cooled.** We've stripped the configuration step, not the engineering. What you order is what we ship, fast.
- **The same Minitron platform.** Built on the same Swiss-engineered chassis as our flagship Minitron. Same drive, same 60 years of know-how.
- **Sharper price, and worth a second look.** Pricing is set by your regional INFORS HT contact. Available until 18 December 2026. Request a quote and your local team will respond immediately.
